Contact E-Mail: melissa.montgomery@wadnr.gov

Date Contacted: August 20, 2006

Time Contacted: 1:00 PM

Contacted By: Lesa Nelson- TechLaw, Inc.

Summary of Communication:

- No sampling was done during derelict boat removal.
- Noticed Sheen on the beach. Only noticed it during low tide.
- The owner (Sesko) removed one boat and DNR removed 4 boats. The Coast Guard Assisted with derelict boat removal
- Took about 30,000 Gallons of oil and water off of the KED/Fletcher J. All of the hazardous material was also removed from the boat (around 100 5-gallon buckets). The anchor was replaced and the boat was left in place. They did not remove the boat because it would have cost around \$400,000 and they only receive \$500,000 per year to remove all of the derelict boats in the county.
- Sesko's removed some of the junk along the beach. DNR asked them to leave the pilings and brick because they did not want the sediment to be disturbed. There were rumors of neighbors taking some of the brick and pilings to line their gardens and their gardens usually did not survive.
- There is a lot of erosion and runoff occurring from the Sesko Property and the McConkey Property because the Sesko's clearcut the brush along the edge of the property. The runoff from the McConkey property goes to the Sesko Property and then on to the beach.
- There are also two large submarine pontoons on the beach. They are trying to get the Sesko's to remove these.
